Art Unit: 3632

DETAILED ACTION

This is a Restriction/Election of Species for application number 10/789,575 Window Box and Mounting System filed on 3/1/04. Claims 1-9 are subject to election/restriction.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method of mounting a flower box, classified in class 47, subclass 41.01.
- II. Claims 2-6, 8 and 9, drawn to a window mounting, classified in class 248 subclass 208.
- III. Claims 2-5, 7, 8 and 9, drawn to a track mounting, classified in class 248 subclass 48.1.

Inventions I, II and III are related as Inventions product and process of use and II and III are distinct products. They can be defined as distinct products if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are distinct because they are not sued together, one is mounted to a window and one is mounted to a shutter. Furthermore, the inventions as claimed do not encompass

Art Unit: 3632

overlapping subject matter and there is nothing of record to show them to be obvious variants.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the apparatus mount could be used to hang any sort of receptacle and the process could be used with a substantially different mounting apparatus.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Conclusion

Any inquiry concerning this communication should be directed to Amy J. Sterling at telephone number 571-272-6823. The fax machine number for the Technology center is 571-273-8300 (formal amendments) or 571-273-6823 (informal amendments). Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center receptionist at 571-272-3600).
